### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

- a. Claim 19 - the prior art does not teach or suggest using a flow regulator as claimed within the conduits of the system;
- b. Claim 29 - the prior art does not teach or suggest using the pressure inside the pressure vessel to regulate the flow of water to the pressure vessel;
- c. Claim 45 - as noted by the Examiner in the final rejection, "selective" and "intermittent" are not the same, such that Harada et al suggests "selecting" a continuous flow of water to both sides of the electrolyzer and none of the other prior art suggests an intermittent flow to the cathode side of the electrolyzer; and,
- d. Claim 50 - the amendment to claim 50, clarifying how the cathode side of the electrolyzer is isolated is supported by the specification, particularly paragraph 21 ("deadheaded and intermittently vented or exhausted"), such that the structure required by claim 50 includes some structure to close off flow from the pump to the cathode side of the electrolyzer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
